Installation

Insul-hold is ideal for use in metal buildings. The 20 guage galvanized 1" wide, 100' rolls may be cut to length for hanging between girts or "rolled out" to span as many wall girts as required. Whether fiberglass or rigid foam, *Insul-hold* secures the insulation to prevent any loss of R-value; thereby, maximizing any investment in energy conservation.

Insul-hold on the job

Insul-Hold is a Division of JR Metal Frames Manufacturing, Inc.
